

ADJUSTABLE FLEXARM STANDS

REPLACE OPEN PIPE OF DIAMETERS:

4 - 10 mm

1/8" - 3/8"

BENEFITS

Reduces the noise level 14 - 23 dB(A)

Decreases air consumption 18 - 47 %

Safety nozzle Meets OSHA standards

Silvent's FLEXARM system is specially designed for applications where the blowing angle must be readjusted continuously. In cases where the Flexblow hose has certain limitations due to its design, Flexarm allows frequent adjustment. The series consists of 6 different arms that can be fitted with a variety of blowing nozzles. Choose among nozzle 5001, 0071, 208, 920, 703, and

705 depending on the type of application and the blowing force required. Flexarms are delivered with a magnetic base as standard. In cases where magnetic attachment is unsuitable, a special mounting plate is available. Adjustment of all joints is easy with a knob and single-handed grip. All Flexarm models fully meet OSHA safety requirements. Patented.

DIMENSIONS

Additional information under: Technical specifications.

Maximum operating pressure: 1.0 MPa (143 psi)

APPLICATIONS

A Silvent 294 being used for blow-off in a drilling operation. As the blowing angle must be continuously readjusted, the FLEXARM provides the perfect tool for constant resetting.

A Silvent 296 being used to keep the milling machine clean during operation. A knob and single-handed grip allow easy adjustment to the quietest and most efficient blowing angle.
